The Hon Leslie Williams MP for Port Macquarie

Ms Elizabeth Koff, Secretary of the NSW Department of Health

20 September 2021

Dear Mrs Williams and Ms Koff

At Mrs Williams's specific invitation, I have composed and am here forwarding to you certain information and questions concerning **water fluoridation**.

Much of the information may seem strange, unsettling, and concerning.

Nevertheless, I trust your good will in considering it. I believe every statement can be justified with published material. I have provided some references in detail, others in abbreviation where they should be easy to find in relation to fluoridation. Please contact me if you have questions you wish me to consider.

There is quite a lot of material provided, although much, much more remains unrepresented. I have tried to fairly comprehensively cover the elements of the matter because the topic directly affects many people's health, and is both serious and important, as were indeed the circumstances of Leslie's invitation.

I have provided background information and asked 22 questions. Your response to each is requested - many require only a brief answer - and will be greatly appreciated by me because of the importance of the topic and, I imagine, the newness to you of much of the material.

I am reaching out in this way because of believing there must be reasons why the published studies and scientific findings about fluoridation are not getting to people, such as yourselves, who are responsible for decisions about fluoridation. I hope to have cast some light on what I believe might be the causal reasons.

I have also attached some information and questions from a person who wishes, for reasons of their employment, to remain anonymous. I have tried not to duplicate the matters covered by them.

Thank you in advance for your attention to what I am presenting, and your serious consideration of the questions being asked. I look forward to hearing from you.

Sincerely

Lisa Intemann
